# Sine Ripple Tesselation
Print, score and fold

Print and Score
Print this page out, cut! around the shape and then score along the valleys from the top, turn over, and score the mountains from underneath. An old inkless ballpoint pen is a great tool for scoring paper.

Fold
This one is a little tricky to fold neatly. Use soft paper, and gently push behind the peaks of the curves to help shape the paper along the score mark. Gently creat the wave pattern that emerges. Experiment with free form designs.
